Made For Well Seated People

Our passion is to design and manufacture seating that complements all types of interiors and tastes.

All our furniture is made using high quality components, and all of them are produced in our factory located in Poland.

Thanks to in-house production we aren't dependent on outside sub-suppliers, other than for wood and gas springs and our lead times are impressive.

Our range is made using cold cure moulded foam, making our chairs comfortable and durable. In fact, we are proud to give our customers a 10-years warrantee on our foam.

As a safety measure, to protect children and pets, we don't use scissor mechanisms on our fully reclining chairs.

We have a large range of fabrics and leathers, and a choice of bases and finishes, which means everyone can find something to fit their home.

VERIKON VM RECLINE

- ✓ They are much more comfortable, and the chairs always look the same because its appearance does not depend only on the manual skills of the upholsterer, but on the foam shape itself.
- ✓ Springs embedded in the foam provide better seating comfort.
- ✓ Density of the foam is usually between 55 and 65 kg / m³. Hardness is also always chosen individually to the chair and if it is seat or back it is different.
- ✓ Guarantee for the foam itself we can easily offer 10 years. This comes from the quality of the chemicals and the density used.

How To Help Saving
Our Environment?

Buy Quality,
Not Quantity.
